### DETAILED ACTION

# Response to Amendment

This Non-final office action is in response to Applicant's request to reopen
prosecution filed 1/6/10, following a decision by the BPAI containing a new grounds
of rejection to claims 1-22 and 35 under 35 USC 101, filed 11/6/09.

- Claims 1 and 35 have been amended, while claims 30-34 have been canceled.
   Claims 1-29, 35 and 36 are pending.
- As discussed below, Applicant's amendment to claim 1 does not overcome the 35 USC 101 rejection to claims 1-22 entered by the BPAI decision. In addition, claim 23 is now rejected under 35 USC 101 following the same rationale as claims 1-22.

## Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-23 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

In order for a method to be considered a "process" under §101, a claimed process must either: (1) be tied to a particular machine or apparatus, or (2) transform a particular article to a different state or thing. *In re Bilski*, 545 F.3d 943,

88 USPQ2d 1385 (Fed. Cir. 2008). If neither of these requirements is met by the claim, the method is not a patent eligible process under §101 and is non-statutory subject matter.

With respect to independent claims 1 and 23 the claim language recites the steps of maintaining a current order, maintaining a prioritized listing, receiving said location-based order, updating said current order, etc., however the claim language does not include the required tie or transformation.

Moreover, as discussed in the BPAI decision filed 11/6/09, on pages 16-17, "[t]he only recitation of structure is in the nominal recitation in the preamble citing a "method executed in a computer apparatus." This recitation is so generic as to encompass any computing system, such that anyone who performed this method in practice would fall within the scope of these claims. Thus, the recitation of a computer apparatus in the preamble is not, in fact, a limitation at all to the scope of the claim, and the claim is directed, in essence, to the method performed by any means. As such, we fail to find that this recitation alone requires the claimed method to include a particular machine such that the method qualifies as a "process" under § 101. We will not allow such a nominal recitation in the preamble to convert an otherwise ineligible claim into an eligible one."

In addition, Applicant's amendment to claim 1 including "said method being carried out by an ordering server..." does not satisfy the requirement, since, as discussed in the BPAI decision, the recitation of a computer apparatus in the

preamble is not, in fact, a limitation at all to the scope of the claim, and the claim is directed, in essence, to the method performed by any means.

Claims 2-22 are rejected based upon the same rationale, wherein the claim language does not include the required tie or transformation.

## Allowable Subject Matter

6. Claims 24-29, 35 and 36 are allowed.
